

BEHAVIOR WITHIN THE SERVICE PARK

Only participating vehicles and those carrying the official ASSISTANCE sticker properly affixed to the front windshield, identified with the vehicle's license plate (only one assistance vehicle per participant will be allowed inside the service park), will have access to the service park.

The service park will be completely closed off and isolated from the commercial area, as well as monitored, on April 15, 16, 17, and 18, 2026 at 22:00.

On April 19, 2026 at 18:00, it must be completely vacated.

Assistance vehicles may not leave the park during the event, except in the case of withdrawal from the event for any reason (breakdown, personal decision, etc.).

The organization will establish two adjacent areas to the park where car trailers and support vehicles for assistance teams may be parked.

The area assigned to each team will be properly marked within the premises and clearly identified on the service park map.

It is recommended to have a 5 kg fire extinguisher available in the assistance area to quickly deal with any unforeseen incidents.

The working area must not be damaged; therefore:

- It is strictly forbidden to anchor bolts for tents or any type of fastening that damages the pavement.
- It is strictly forbidden to connect to the electrical network of Grupo Adelma facilities, under penalty.
- It is strictly forbidden to spill any type of substance (oil, liquids, etc.) on the park surface for environmental reasons. It is recommended to use a protective tarp under the vehicle. If any contaminant is accidentally spilled, it must be immediately removed by the responsible team.

All waste must be collected and removed in accordance with current regulations.

Driving at inappropriate speeds within the service park is strictly prohibited and may result in exclusion.

Failure to comply with any of these rules will result in penalties ranging from €150 to €1000.
